Sir,

Re Additional Bore-wells for Tarikere

I have the honour to state that several schemes for the supply of protected water to Tarikere Town were investigated and the scheme of supplying water from the Siddlipur anicut was considered to be a feasible one But this has been given up for the present, owing to its costliness It is estimated to cost about 3 lakhs of rupees according to the existing rates At present, there are two bore-wells in the town and the water is pumped by electric power The water by means of the borewells is supplied to about a quarter portion of the town only

2 The question of drilling one or two bore-wells was discussed by me on 13-1-45 along with the Sanitary Engineer and he was of opinion that this may be tried Accordingly, he has sent an estimate for Rs 5,000/- for putting two bore-wells and has stated that a regular scheme for improvement of water supply from the bore-

bore-wells can be prepared only after the yield is ascertained The town Municipal Council, Tarikere, have resolved on 31-1-1945 that Government be requested for a grant of Rs.2,500/- as the Municipal Council is unable to meet the entire cost of Rs 5000/- with its slender resources

3. In the circumstances, I request that orders of Government may be kindly obtained for sanctioning a grant of Rs 2,500/- as prayed for by the Municipal Council. The Municipality may be permitted to contribute Rs 2,500/- from its closing balance for this purpose.

4. The connected Records are enclosed for favour of reference.

I have the honour to be,
Sir,
